Maximum Marks	3 Marks

Customer Problem Statement Template: The following problem statements describe the challenges faced by potential LegalEase users from the customer's point of view. They are based on the documented use cases of startup founders, freelancers, landlords, professionals and individuals who need customizable legal documents.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A startup founder or small-business owner	Create a professional employment contract	I have no legal expertise or the time to draft one from scratch	Employment contracts are complex and mistakes can create serious liabilities	Uncertain, worried, and unsure whether my document is safe
PS-2	A freelancer who needs an NDA before sharing work with a client	Create a customized NDA quickly	Writing an NDA from scratch is difficult without legal knowledge	Confidentiality terms must be carefully worded to protect both parties	Overwhelmed and hesitant to move forward
PS-3	A landlord preparing a residential lease agreement	Create a lease agreement	Manually preparing formatting and clauses is time-consuming	Lease documents must contain multiple terms and legal provisions	Frustrated by repetitive document preparation
PS-4	An individual or professional who does not understand legal documents	Generate a legal document	Traditional methods require expensive legal assistance	Legal documents are difficult to draft and customize	Overwhelmed and need a simple, guided solution

Overall Customer Problem

People who need basic legal documents may struggle with legal terminology, document structure, formatting, customization and the time required to create professional documents. LegalEase addresses this problem by accepting user inputs such as document type, parties, terms and effective dates, generating AI-assisted legal content, providing an editable preview, and supporting TXT, DOCX and PDF export.

Source basis: LegalEase project documentation describes employment contracts, NDAs and lease agreements as key use cases and identifies customizable generation, editable previews and multi-format exports as core capabilities.
