Project Demo Planning

Date	15 March 2026
Team ID	XXXXXX
Project Name	LegalEase
Maximum Marks	1 Mark

Project Demo Planning:

The LegalEase demo will present the project in a clear sequence: introduce the problem, explain the AI-powered solution and architecture, demonstrate the main user workflow, show document editing and multi-format downloads, and conclude with testing and a short Q&A.;

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce LegalEase and explain the need for simplified legal document creation. Briefly describe the target use cases such as employment contracts, NDAs and lease agreements.	2	Member 1
2	Solution Overview & Architecture	Explain the Streamlit frontend, FastAPI backend, Gemini AI core and document formatting modules. Show how user inputs travel through the system to generate the document.	3	Member 1
3	User Input & Document Generation	Enter document type, parties, terms and effective date. Click Generate Document and show the AI-generated legal content returned through the FastAPI /generate workflow.	4	Member 2
4	Preview & Editing	Display the styled HTML preview, use the Edit Document option and modify the generated content before saving.	2	Member 2
5	Document Formatting & Downloads	Demonstrate TXT, DOCX and PDF downloads. Show the DOCX/PDF branding, headings, terms table or bullets, logo and footer formatting.	3	Member 3
6	Testing, Deployment & Q&A;	Briefly show local deployment/testing, confirm the end-to-end workflow and answer questions about Gemini integration, API logic and document generation.	2	Member 3

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce LegalEase, its purpose and example legal-document use cases.
2	Solution Overview	Explain Streamlit → FastAPI → Gemini AI → document formatting flow.
3	Live Feature Demonstration	Enter inputs → Generate Document → Preview → Edit → Download TXT/DOCX/PDF.
4	Q&A; Session	Answer questions on architecture, Gemini integration, formatting, deployment and testing.

Demo Preparation Checklist: Start the FastAPI backend and Streamlit frontend, verify the Gemini API key is available through the .env configuration, prepare sample document inputs, and verify TXT/DOCX/PDF download functionality before the demonstration.
