Customer Journey Map

Date: 29 September 2026 **Team ID:** _____ **Project Name:** LegalEase **Maximum Marks:** 2 Marks

Phase of Journey	Stage 1 Identify Legal Need	Stage 2 Generate & Edit Document	Stage 3 Download & Use
Actions	• Identifies the need for a legal document • Selects document type (contract, NDA, lease, etc.) • Collects parties, terms and effective date	• Enters document details in LegalEase • Clicks Generate Document • Reviews the AI-generated document • Edits wording if needed	• Chooses TXT, DOCX or PDF • Downloads the completed document • Uses the branded, formatted document for the intended purpose
Touchpoint	• LegalEase interface • Document-type selection • Input fields for parties, terms and dates	• Generate Document button • AI-generated preview • Editable text area • Styled HTML preview	• TXT/DOCX/PDF download buttons • Branded document with logo and footer • Saved final document
Customer Thought	• “What type of legal document do I need?” • “What information should I provide?” • “Can I create this without legal expertise?”	• “Is the generated content relevant to my inputs?” • “Can I edit the document before using it?” • “Does the formatting look professional?”	• “Which format should I download?” • “Is the document ready to use?” • “Can I easily save and share it?”
Customer Feeling	• Uncertain about legal requirements • Hopeful for a simple solution • Slightly concerned about accuracy	• More confident after seeing the generated draft • Engaged while reviewing/editing • Reassured by the structured format	• Satisfied with the completed document • Confident about saving/sharing it • Relieved that the process is completed
Process Ownership	• Customer/user • LegalEase Streamlit frontend • Input validation/backend workflow	• LegalEase FastAPI backend • Gemini AI integration • Streamlit preview/edit interface	• LegalEase formatting/export utilities • DOCX/PDF/TXT generation • Customer/user for final download and use
Opportunities	• Add guided prompts for required information • Provide examples for each document type • Add clear input validation	• Add stronger explanations for generated clauses • Provide version history/undo • Add a clearer review checklist before download	• Add a single “Download” workflow with format selection • Provide document status/confirmation • Add secure saved-document history

Based on the LegalEase project description, workflow, frontend functionality, editing, and export features. The map follows the supplied Customer Journey Map template: Actions, Touchpoint, Customer Thought, Customer Feeling, Process Ownership, and Opportunities.
